

# Javier González

## Senior Software Developer | Typescript, Vue, Nuxt, Golang

Madison, WI | javier.e.glz@gmail.com | 773.751.9536

## Professional Summary

Product-focused **Senior Software Developer** with a background in design and architecture, specializing in high-performance frontend systems. Proven track record of scaling applications that serve millions of daily users.

**Skills:** Typescript, Vue, Nuxt, React, Vite, Golang, Tailwind, CSS, Performance Optimization, WCAG Accessibility Standards, Github Actions, Bash, AWS Lambda

## Professional Experience

### Senior Frontend Developer | ADUSA (Peapod Digital Labs) *March 2021 – Present*

- Led a greenfield modernization of a core web application using **Nuxt**, establishing organizational standards for **TDD** and a fully tokenized design system.
- Completely overhauled the application release cycle, increasing deployment frequency **from 6 releases per year to weekly releases** by engineering a deployment pipeline using **GitHub Actions** and automated E2E testing with **Playwright**, static analysis, and modern practices of separation of release and deployment.
- Automated **AI Agent Workflows** for ensuring code quality across the company reducing known code quality issues.
- Owned an end to end initiative to modernize our build system from **Webpack** to **Vite** to achieving near-instant developer feedback and saving over **10 hours per month** in developer productivity and cutting build time by an order of magnitude.
- Aggressively reduced bundle sizes and optimized frontend architecture, slashing **LCP scores from 4.3 to 2.2** and boosting overall **Lighthouse scores from 24 to 73**.
- Executed a high-priority tactical initiative that successfully increased overall customer satisfaction scores by **4 percentage points** within a 90-day window.

### Frontend Developer | Keypath Education - September 2020 - March, 2021

- Developed interactive web applications to incorporate learning design to online courses.
- Refactored large portions of the Learning Management System to meet strict ADA and WCAG AAA standards.

### Software Automation Engineer | Celltrak Technologies - August 2019 - September, 2020

- Realized a **20% reduction in testing time** for healthcare products by architecting a robust automated testing framework using Java and Selenium.
- Developed testing standards for ensuring **HIPAA compliant access control**.

## Projects

- **Memory Captures** (2019 - 2021) I was the co-founder & lead developer where I scaled a self-started venture to \$4,000 in monthly recurring revenue by digitizing the restaurant photography experience. I Designed and deployed a full-stack digital asset delivery platform using Laravel, Vue.js, and MySQL to automate customer delivery and administrative workflows.
- Contributor to **Gitlab Duo**, an agentic development tool by gitlab.

## Education

- **Masters of Architecture**, Tulane University | **B.A. Architecture**, UNLV
